

Goat anti-Rabbit IgG Polyclonal Antibody

Basic information:

Catalog No.:	UB0013-1	Source:	Goat
Clonality:	Polyclonal	Isotype:	IgG
Purity:	>95% as determined by SDS-PAGE.		

Useful Information:

Applications: ELISA, Immunomicroscopy, WB, Dot blot, ICA

Specificity: Recognizes native Rabbit IgG.

Format: Liquid

Purification: Affinity purified.

Immunogen: Native Rabbit IgG.

Presentation: PBS, pH 7.4.

Description: Anti-Rabbit secondary antibodies are affinity-purified antibodies with well-characterized specificity for rabbit immunoglobulins and are useful in the detection, sorting or purification of its specified target. Secondary antibodies are generated by immunizing the host animal with a pooled population of immunoglobulins from the target species and can be further purified and modified (i.e. immunoaffinity chromatography, antibody fragmentation, label conjugation, etc.) to generate highly specific reagents.

Storage: Store at 4°C short term and -20°C long term. Avoid freeze-thaw cycles.

Note: Test systems and platform change may cause different results, please contact us if you have any questions.
