

ApoB Recombination Protein

Basic information:

Catalog No.:	UDP9097-2	Source:	Human
Expression Host:	HEK293	Type:	Recombinant protein
Purity:	>90 % as determined by SDS-PAGE		

Useful Information:

Construction:

A DNA sequence encoding the ApoB Protein was expressed with His-tag in C terminus.

Molecular Mass:

ApoB Recombination Protein consists of 298 amino acids.

Formulation:

Liquidin PBS,PH7.4

Biological Activity

N/A

Endotoxin:

N/A

Storage:

Recombinant proteins are provided as frozen liquid which are shipped with dry ice. Bulk packages can be provided as lyophilized powder which shipped with blue ice.

Reconstitution:

According to the application.

Description:

ApoB protein is the most important apolipoprotein on chylomicron and LOW density lipoprotein, which can form low density lipoprotein cholesterol and remove the residue of lipid metabolism through endocytosis mediated by low density lipoprotein receptor (LDLR) on the surface of liver cells.

Note:

This material is offered by Gene Universal for research, laboratory or further evaluation purposes. Not for human use Made in China.
